

TRADE AND SUSTAINABLE DEVELOPMENT

Matteo Fiorini (OECD/EUI)

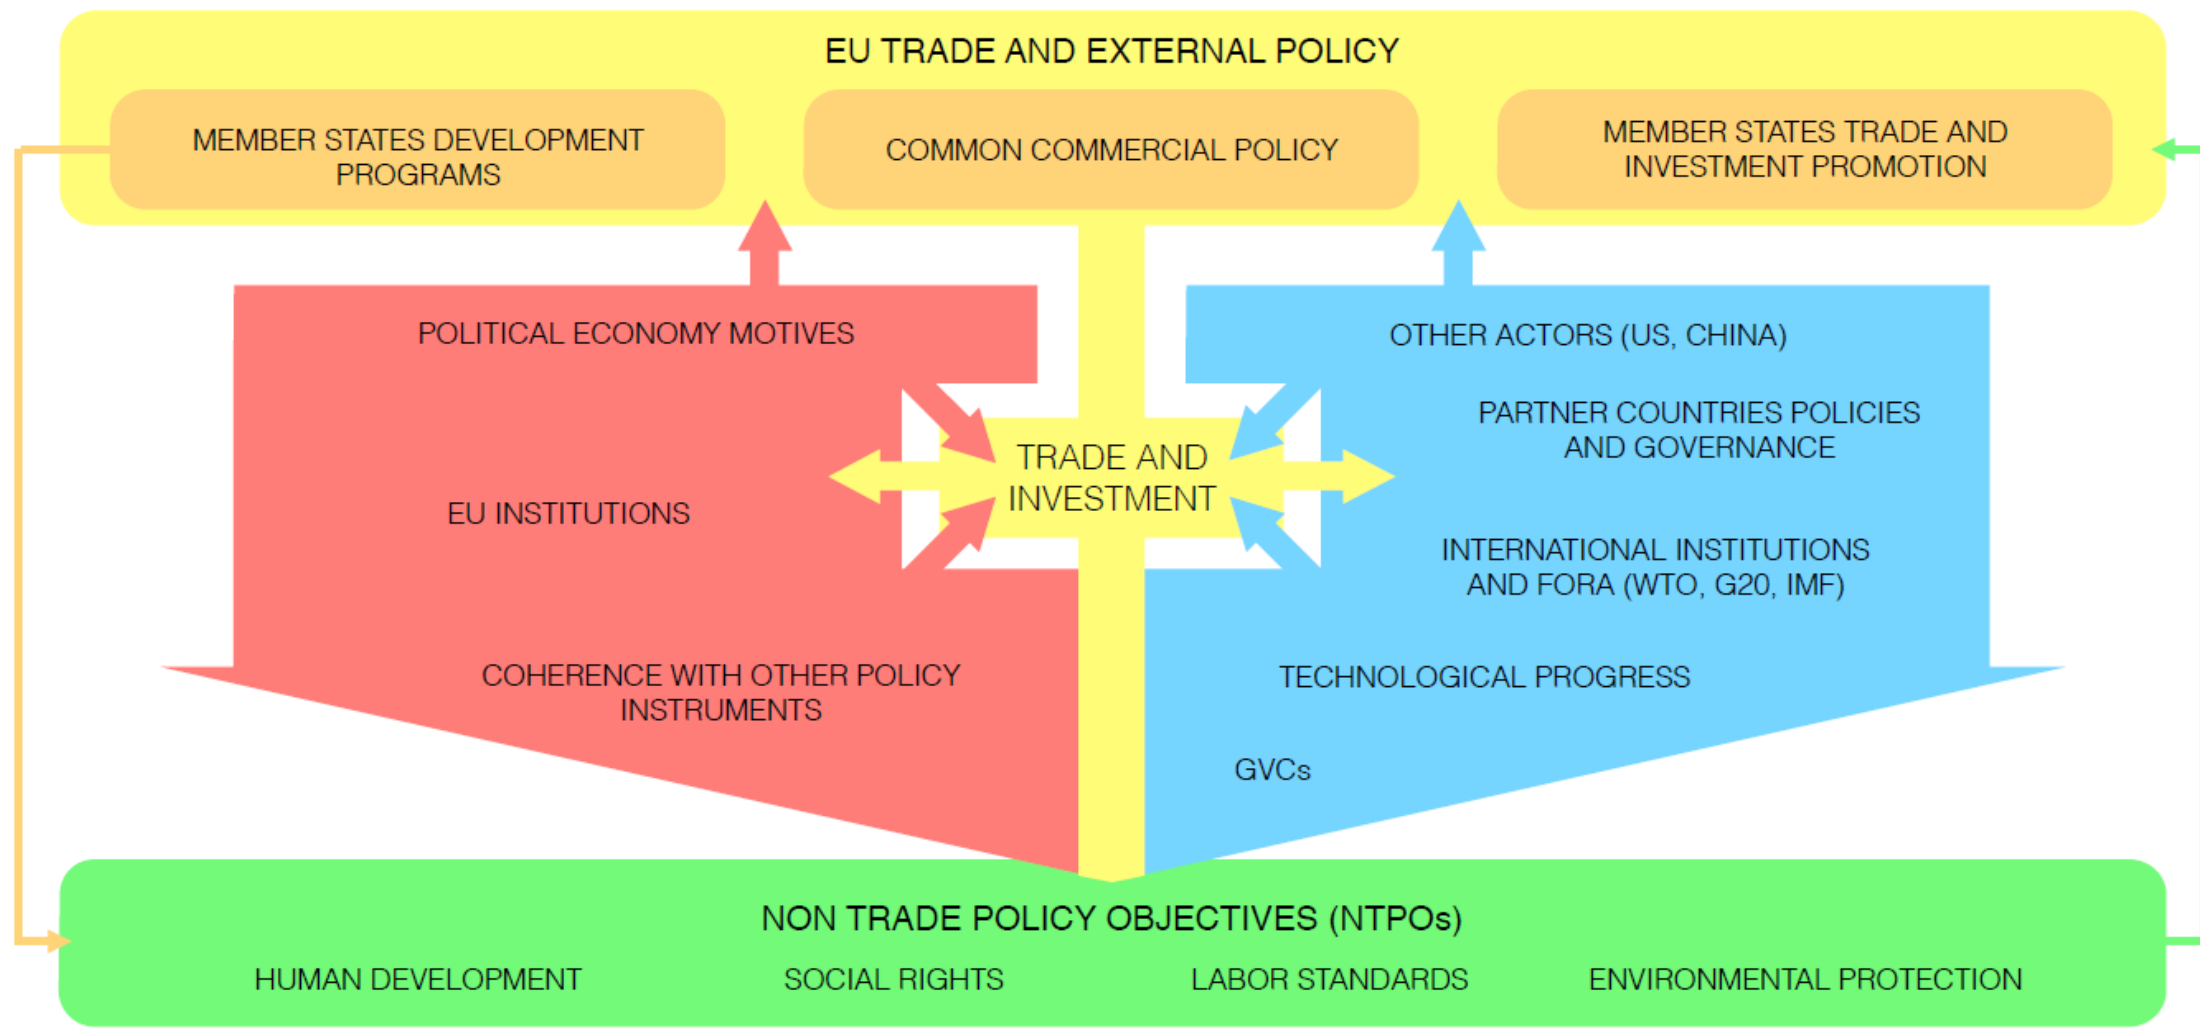

RESPECT final conference / Florence / Oct 2021

The project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 770680

Where it all began

What we did, what we found

- We assessed trade policy performance outside/beyond it's comfort zone
- We provided evidence that some tools might not work
- We identified promising solutions to maximize trade policy impact on sustainable development

Building on RESPECT finding

Exploit trade policy comparative advantage

- Identify goods and services that contribute to sustainable development
- Use trade policy to achieve trade objectives

Environmental services

- DeMelo & Solleder (2019) – EGA agenda need to include NTBs and the agenda shall be extended to environmental services
- OECD ongoing work to extend the STRI to environmental services
 - Identify policies that restrict trade of services which contribute to environmental sustainability
